NINSON DOBIYAS

JUNIOR DEVOPS / DEPLOYMENT SUPPORT | CI/CD, LINUX, DOCKER

Dubai, UAE | +971 56 904 5230 | ninsond69@gmail.com | Notice period: 30 days

Portfolio: https://ninson-dobiyas.vercel.app/ | GitHub: https://github.com/NinsonD

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in GitHub CI/CD, application deployments, Linux, Docker and production support. Supports an Oracle cloud-hosted Frappe environment and a local Focus server alongside web application delivery. Seeking junior DevOps, deployment support or application operations roles, bringing development knowledge and practical troubleshooting experience.

TECHNICAL SKILLS

Software delivery: Git, GitHub, GitHub CI/CD pipelines, release and deployment support

Systems and operations: Linux, Docker, Oracle cloud-hosted Frappe support, Focus server support

Web infrastructure: cPanel, Vercel, Netlify, hosting, domains, DNS, SSL, production troubleshooting

Development and data: JavaScript, TypeScript, Node.js/Express.js, React/Next.js, PHP/Laravel, REST APIs, MySQL, MongoDB

PROFESSIONAL EXPERIENCE

Full Stack Developer | Al Namariq IT Solutions

Dubai, UAE | July 2025 - Present

- Build and support GitHub CI/CD pipelines for software delivery and application deployments.

- Manage web hosting and releases; troubleshoot deployment issues, domain configuration, DNS and SSL.

- Support the Frappe environment hosted on an Oracle cloud server and the local server running Focus software.

- Develop and maintain websites, APIs and internal quotation/material-calculation tools, connecting development work with production delivery.

- Work within a two-person IT team to resolve application and business-system issues and support ERP/POS users.

Web Developer Trainee | Edure

April 2024 - March 2025

- Built MERN applications using React.js, Node.js, Express.js and MongoDB for e-commerce and business-management use cases.

- Developed REST APIs with JWT authentication; integrated frontend and backend services and supported debugging, Git collaboration and deployment.

SELECTED IMPLEMENTATIONS

GitHub CI/CD and web application delivery

Built and supported GitHub pipelines and release workflows for web application delivery; handled hosting and deployment troubleshooting.

Cloud-hosted and local business systems

Supported Oracle cloud-hosted Frappe and a local Focus server, alongside DNS/SSL and production application support.

EDUCATION AND CERTIFICATION

Bachelor of Computer Applications (BCA) | Sreenarayanaguru University | 2021-2024 batch

Certified MERN Stack Developer | Edure | 2025
